## **DDS Companies Among Rochester's Top 10 Businesses -Company ranks seventh among top 100-**

**The DDS family of Companies**, leading local providers of site planning, site design, and construction services, ranked number seven on the list of Rochester, New York's Top 100 Companies for 2007. "With only 30 other companies ranking on the list for the first time, we feel honored to be recognized as leaders in the Rochester marketplace," said Sean G. Donohoe, Owner and President.

The Rochester Top 100 is a program that salutes high performing companies, sponsored by the Rochester Business Alliance and the local office of KPMG LLP, a worldwide accounting firm. Eligible companies must be privately held, have revenue of at least \$1 million in each of the three most recent fiscal years, and be headquartered in the greater Rochester area. In the past three years, the **DDS Companies** revenues have increased by 462 percent and employment has increased by over 40 percent.

"Six years ago Sean was operating the business out of his basement, with one employee and one bulldozer. Now DDS employs 155 people and our fleet consists of over 180 pieces of heavy construction equipment and trucks", said Victoria Damon, Chief Financial Officer. "Our growth is energizing and it's exciting to be part of the team", said Damon.

**The DDS Companies** are one of the fastest growing companies in New York State, and are organized into three business units; **DDS Engineers**, **DDS Constructors**, and **Rochester Utility Contractors**. The companies work in conjunction to add value to each other's work, and provide a single source solution to their customers.

**DDS Engineers** is a civil engineering firm specializing in site design and land planning services for commercial, residential, and telecommunications site development. **DDS Constructors** provides site construction services to a broad range of customers from residential and commercial developers, to universities, and general contractors. **Rochester Utility Contractors** focus on underground utility construction and network installation. Customers include gas distribution companies, electrical utility companies, broadband communications providers, commercial and residential land developers, as well as general contractors.
